

HOW TO WHITELIST

Being whitelisted will give you access to the presale, which will open 24 hours prior to the main sale and have a slightly discounted mint price. You will also get the “whitelist” role in the discord server and access to the “whitelist chat.” Only 200 Apes will be sold in the presale.

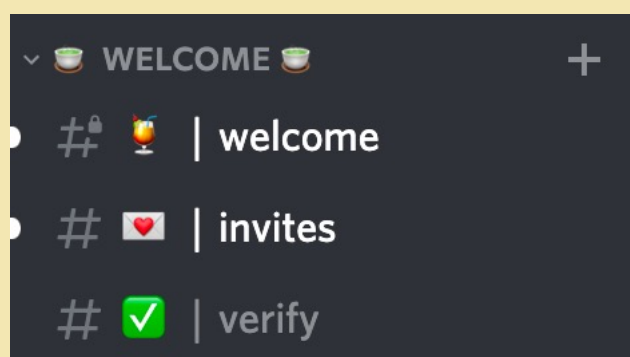

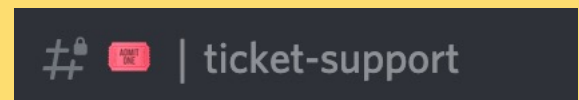

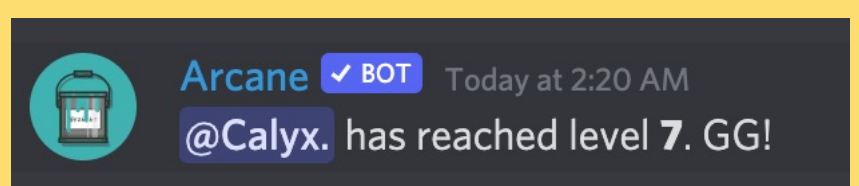

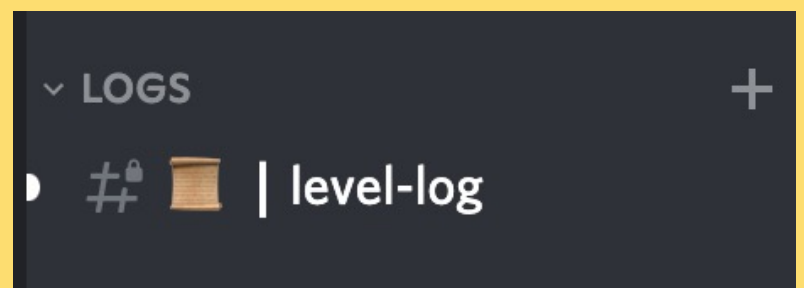

There are THREE ways to get a Whitelist Spot

WAY 1

REACH LEVEL 7 IN THE DISCORD

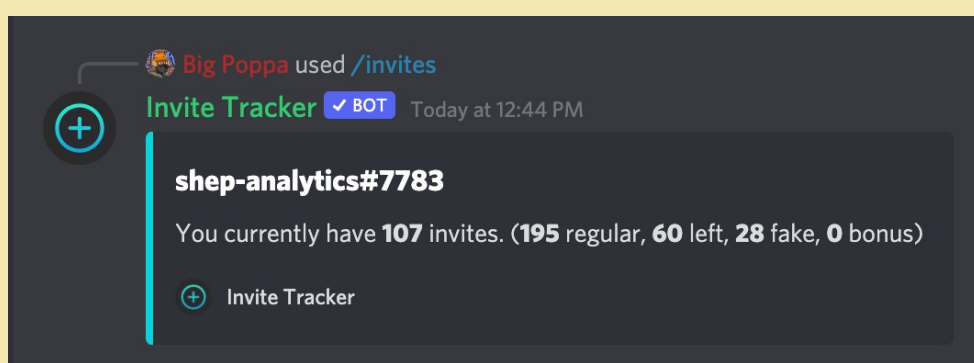

The level-log channel in the discord will show your level. You can level up by posting memes and chatting in discord channels. The leveling is monitored by Arcane-Bot. If you reach level 7, open a ticket, send us a screenshot, and a moderator will add you to the whitelist.

WAY 2

Invite 5 friends

Our discord uses the invite-tracker bot. Once you create your own personal invite-link to the server go to the invites channel, and type “/invites” to get a list of how many people have joined the server through your link. Screenshot your link and submit it through the ticket system, and you will be added to the whitelist.

WAY 3

Twitter

Tweet @NFTs_LLC and receive 100 favorites or retweets. Screenshot your successful tweet and submit it as a ticket in the Discord!

Once you are on the whitelist welcome! Check the roadmap for the specific mint date!
